HAIR TRANSPLANT POST-SURGERY KIT

The first set of products specifically formulated by the surgeon for the hair-transplant post-surgery phase

M I L A N O

Kmax Healing Hair Transplant Post-Surgery Kit is the first set of products specifically formulated to take care of the hair and scalp after an hair-transplant session.

Developed in collaboration with specialized doctors with decades of experience in baldness surgery, following the strictest criteria in the selection of ingredients and active ingredients. The products are dermatologically tested and Made in Italy according to the most rigorous quality standards.

The Research behind the products of the kit started from the need of numerous surgeons, looking for a kit to provide to the patient in the delicate and very important immediate post-operative phase and in the weeks following the transplant session.

During this period, it is essential to gently soothe and cleanse the scalp to avoid the mechanical and premature detachment of clots (crusts) formed during the surgery.

The moisturizing, anti-inflammatory and emollient action of the ingredients used in the formulation of the products facilitates their physiological detachment and at the same time helps cell regeneration.

HEALING HAIR TRANSPLANT POST-SURGERY FOAMER SHAMPOO

Ultra-gentle foam shampoo based on Aloe Vera Gel
with soothing and moisturizing action

Foamer Shampoo specifically formulated for the immediate post-transplantation phase with an ultra-gentle, calming and moisturizing action to avoid the risk of accidental removal of the newly implanted follicular units.

The soft foam produced by the Foamer dispenser is immediately available to cleanse the scalp decreasing the possibility of causing trauma to the transplanted hair.

A peculiar and unique feature of its kind is that water, normally used as a base in all detergents, has been completely replaced by Aloe Vera Gel with the addition of active ingredients such as Wheat Proteins, Jojoba Oil, Inulin, Alpha-Bisabolol, glycerine extract of Mallow and Vitamin E for a more effective anti-inflammatory and emollient action.

The cleansing base is extremely delicate thanks to the use of high-quality surfactants and absolutely skin-friendly.

The formula is completed by Procapil, a patented ingredient containing a mix of stimulating active agents important for anchoring the hair roots and promoting the activity of keratinocytes.

HAIR TRANSPLANT POST-SURGERY FOLLICLE ACTIVATOR SUPPLEMENT

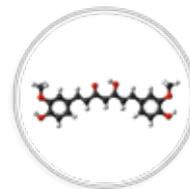

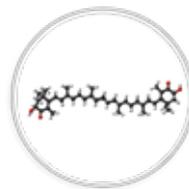

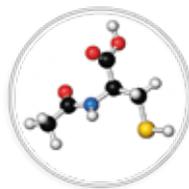

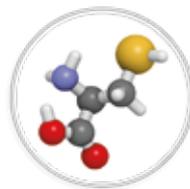

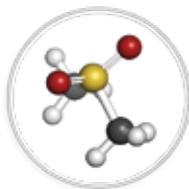

Multi-component supplement based on MSM, L-Cystine, NAC, Curcuma, Vitamin C, Vitamin E, Astaxanthin and Biotin

Food supplement specific for the post-transplantation phase based on useful principles to increase and speed up the regrowth of hair and follicular units and, at the same time, perform an antiseptic, anti-inflammatory and antioxidant action.

MSM (Methylsulfonylmethane) and L-Cystine guarantee a correct and healthy keratinization and increase its rate of endogenous formation; they can therefore be considered valid help to stimulate faster hair regrowth (anagen phase) and increase the resistance of hair and skin appendages.

Turmeric extract (titrated 95% in curcumin), astaxanthin and NAC (N-Acetyl-Cysteine) act synergistically as antioxidants and anti-radicals together with Vitamin C and Vitamin E, while providing a strong anti-inflammatory action of maximum benefit in the post-operative period.

Biotin (Vitamin H), by regulating the production of glycogen, the main source of cellular energy, contributes to maintaining healthy skin appendages such as skin and hair.
